

NOT A 'TYPE' OF PIT BULL

A DILUTE of BLACK

NOT RARE - IT'S A FAD!

BLUE DOG

Myths

'Blue Pit Bulls' are not rare. Because people think they are, backyard breeders are over-producing thousands every year to feed the fad. They're common in animal shelters and pit bull rescue groups. Blue dogs are not actually blue! They're black dogs with diluted coats. A 'Blue Nose' is not a type of pit bull. It only describes the silvery gray color of a diluted black dog's nose and coat. Got to have one? Rescue a Blue!
